

Thirteenth Annual Report

of the

Sharon Sanatorium Sharon, Mass.

THE SHARON SANATORIUM FROM THE SOUTH-EAST.

THIRTEENTH ANNUAL REPORT

OF THE

SHARON SANATORIUM

FOR

PULMONARY DISEASES

SHARON, MASS.
March, 1904

INCORPORATED MARCH, 1891

BOSTON
GEO. H. ELLIS CO., 272 CONGRESS STREET
1904

OBJECT OF THE SHARON SANATORIUM.

To supply a suitable institution for the treatment of incipient pulmonary diseases only, arising in women who are unable, for pecuniary and other reasons, to seek distant health resorts. Only patients who are of limited means are received, and no far advanced cases are admitted.

Price of board, \$5.00 per week, exclusive of washing. The services of the Medical Directors and medicines are given free of charge.

Visiting hours { from March 1 to November 1, 3 to 5 P.M.; from November 1 to March 1, 1 to 3 P.M.

Visitors are kindly requested to adhere to these hours.

Applications must be made to the Superintendent, Sharon, Mass.

THE SHARON SANATORIUM FROM THE SOUTH-WEST.

OFFICERS OF THE SHARON SANATORIUM.

Board of Directors.

Prof. WILLIAM T. SEDGWICK, President.

N. H. STONE, Treasurer.

614 Sears Building, Boston.

Mrs. Charles A. Porter, Secretary.

AUGUSTUS HEMENWAY.

Rev. EDMUND F. MERRIAM.

ARTHUR DEHON HILL.

Mrs. HENRY P. KING.

Mrs. W. T. SEDGWICK.

VINCENT Y. BOWDITCH, M.D.

ROBERT W. LOVETT, M.D.

L. VERNON BRIGGS, M.D.

Medical Director.

VINCENT Y. BOWDITCH, M.D.

Consulting Physician.

FREDERICK I. KNIGHT, M.D.

Resident Physician.

WALTER A. GRIFFIN, M.D.

Matron and Superintendent.

Miss Alice R. Hodges.

AUXILIARY COMMITTEE.

Mrs. E. F. Bowditch, President.

Mrs. Alfred R. Weld.

Mrs. Robert M. Morse.

Mrs. Robert F. Perkins.

Miss M. A. YARDLEY.

Mrs. Eugene A. Crockett.

Mrs. Charles A. Porter, Sec'y.

Mrs. CHARLES S. HAMLIN.

Mrs. Paul R. Frothingham.

Mrs. E. Amory Codman.

Mr. HERBERT JAQUES.

Dr. WALTER C. BAILEY.

Mr. Joseph Lindon Smith.

THE PARLORS.

All gifts of money may be sent to the Treasurer,

Mr. N. H. STONE,

614 Sears Building, Boston.

DIRECTORS' REPORT.

WITH the appearance of the thirteenth report a change in the name of the institution will be noticed in accordance with the decision of the corporation at the last annual meeting, when it was voted that the word "Sanitarium" should be altered for the sake of greater uniformity to the more modern and now almost universal term "Sanatorium." This decision was made, moreover, because the word "Sanatorium" from its Latin derivation (sanare, "to heal") expresses better than the original name the nature of institutions intended for the treatment of incipient pulmonary disease.

During the past year additional evidence has been given of the wide-spread interest in the Sanatorium from the fact that two well-known periodicals, the *Review of Reviews* and the *Outlook*, have published illustrated descriptions of the methods pursued at Sharon; and still another article is shortly to appear in *Everybody's Magazine*. Letters are frequently received from all parts of the United States, asking for information and expressing great interest; and even in European journals mention has been made of the work being done at Sharon.

It would seem hardly necessary to call attention to the fact of the now universal enthusiasm in the work of diminishing the ravages of tuberculosis. With the knowledge, however, that the disease is communicable under certain conditions, the difficulty of obtaining suitable accommodations for consumptives in boarding-houses is becoming daily

more apparent. Consequently, the necessity for properly regulated sanatoria for such cases becomes with each year more pressing.

Of even greater importance than the benefit given to the individual in the Sanatorium is the educational effect upon the community, each patient acting as a missionary to family and friends to teach the importance of fresh air and food for the prevention as well as the cure of disease. Of the truth of this statement frequent and striking proofs have been received during the past few years.

The number of applications during the year has far exceeded the capacity of the institution; and, although many of those who apply are past the stage which makes them suitable cases for treatment at Sharon, yet there are many of a more favorable nature who have to be turned away or asked to wait because of lack of room.

One of the most gratifying features has been the subsequent histories, recently published, of seventy-nine cases who, from the opening of the institution in February, 1891, up to two years ago, were discharged with the disease arrested. Of these at last accounts only 15 per cent. had relapsed and died, the cause of death in the majority of cases having been either a return, against advice, to unhealthy methods of life or from the fact that the disease, when first discovered, had advanced too far to hope for permanent cure and in which an arrest of disease was unexpected.

The majority of all the others have been engaged in active work, and write enthusiastically of their condition and of their pleasant memories of the Sanatorium. The following extract from a letter written by a former patient who recovered her health is typical of the feeling which former patients express: "The Sanatorium is a place which will always call forth my deepest love and appreciation; for it

was here that I, as well as many of my friends, recovered that greatest of blessings, health. Will you kindly accept the enclosed money order for the benefit of the dear old Sanatorium?" This is one of many similarly expressed letters received from former patients.

The greater cost of living has made a large inroad upon the treasury. To increase the price of board to partially meet this deficiency has not been thought wise, for it would defeat the object of the institution, which is intended for people of limited means only. Our Superintendent, Miss Hodges, has succeeded, however, in developing the resources of the farm land so well that a large saving has been made in the expenditures for vegetables and hay. In spite of this saving, however, we need generous assistance. Money is earnestly solicited for the following purposes:—

- 1. An endowment fund of at least \$200,000.
- 2. A fund for a scientific laboratory.
- 3. Donations to meet current expenses and necessary outlays for repairs, etc.
- 4. A fund to assist worthy people who are unable to pay the present price of board.

An endeavor is now being made also by members of our Auxiliary Committee to increase the number of Annual Subscribers. Annual donations even of small sums will be most gratefully received.

Donations of old cotton and linen are always acceptable.

In offering their sincere thanks to the many friends who have assisted them in the work during the past year, especially the newspaper press of Boston and the Sharon Advocate, the Directors express the hope that the increasing needs of the institution will be met by a generous response from the public.

THE DIRECTORS.

MEDICAL REPORT.

| Full capacity of the Sanatorium | • | 2 I |
|-------------------------------------------------|---|-----|
| Number of patients entered since March 1, 1903 | | 46 |
| Number of patients discharged during the year . | | 46 |

Of those discharged, four remained less than one month, and are, therefore, not considered.

The following table shows the condition of the patients at entrance and the result of treatment:—

| | Incipient. | Advanced. | Suspected Phthisis. | Totals. | Percentages. |
|-------------------------------------|------------|-----------|------------------------|---------|-----------------|
| Arrested | 17 | 6 | | 23 | 54 + |
| Improved | 4 | 8 | I | 13 | 31 — |
| Not improved | | 4 | | 4 | 9 . |
| Apparently well (Doubtful Phthisis) | | | 2 | 2 | 5 — |
| Totals | 21 | 18 | 3 | 42 | |

In strict fairness to the above tables, it should be stated that the three cases of suspected phthisis showed such suspicious symptoms of beginning pulmonary trouble that they

THE SUN-BATH (WINTER).

might have been classed with those having definite proof of disease. Inasmuch as special tests were not possible in these cases, however, they have been put in the category of doubtful cases.

The percentage of arrested and improved cases naturally varies from year to year somewhat, according to the condition of patients upon entrance.

The results every year, however, point to the wisdom of taking cases for treatment as early in the course of disease as possible.

In making these statements, practically the same terms are used as heretofore. By "incipient" is meant cases in which the physical signs, such as changes in percussion or respiration, possibly a few rales, are confined to small areas, usually in one or both apices of the lungs, and in which only slight constitutional signs, such as fever, indigestion, or loss of strength, are present.

The term "advanced" is applied to all cases in which the symptoms and signs in the chest are beyond the incipient stages. Far-advanced cases, in which the pulmonary and general symptoms point to a practically hopeless condition, are not received.

The term "arrested" is applied to all cases, with very rare exceptions, in which cough and fever have disappeared when the sputa, if present, show an absence of bacilli, the general symptoms and appearance being those of health, when they leave the Sanatorium.

The term "cured" is not used until many months after the disappearance of all active symptoms, and when the patient has returned to ordinary conditions of life. Many of those discharged as "arrested," however, would, from their general condition, be with justice classed under the more favorable term.

Among the "arrested" cases (23),

| The number who had bacilli in their sputa was | 6 |
|--------------------------------------------------------------------|----|
| The number who had a positive tuberculin reaction was | 3 |
| The number who had physical evidences of incipient tubercular dis- | |
| ease in the chest without sputum, or in which the sputum did | |
| not contain bacilli, was | 14 |
| | 23 |

One of these latter afterwards developed several months later rapidly advancing signs, and had tubercle bacilli in the sputum. Four gave a history of hemoptysis. Two had had pleurisy with effusion.

| Average stay of all cases | | | | | • | | • | 3.1 months |
|-------------------------------------|----|-----|-----|---|---|---|---|------------|
| Longest stay of "arrested" cases | • | | | | | | • | 8.3 " |
| Shortest stay of "arrested" cases | • | | | | | | • | 1.2 " |
| Average stay of "arrested" cases | • | | • | | | | | 4.5 " |
| Average gain in weight of all cases | • | • | | | | | | 9.9 pounds |
| Average gain in weight of "arrested | " | cas | ses | | | | | 14.9 " |
| Average gain in weight of "improve | d' | " c | ase | s | | • | | 10.9 " |
| Average age of "arrested" cases. | | | • | | | | | 29.9 years |
| Average age of all cases | | | | • | | | | 28 " |

In stating the shortest stay of an "arrested" case as a little more than one month, it should be remembered that no claim is made other than that all active symptoms had ceased almost immediately after entrance. The patient left, however, contrary to advice, even though there was outwardly an apparent condition of good health.

Of the 21 cases still in the Sanatorium, the disease is in a state of arrest in 8, and 10 are improved. 3 have been in the institution too short a time to warrant any conclusions being drawn regarding their condition. Tubercle bacilli have been found in 13. One has had a positive tuberculin reaction. One has had tuberculosis of the knee, while in 6 the

CAMP IN INFIRMARY SANITARIUM CAMPIN

physical examination alone and the history warranted making a diagnosis of tuberculosis.

Favorable reports are still received from the majority of the patients who were formerly in the Sanatorium and discharged as "arrested cases." Some of these patients left Sharon nearly twelve years ago, and have been well ever since, leading active lives.

We are indebted again to Dr. Sarah E. Bond and Dr. Walter C. Bailey, who have rendered kindly assistance during the year.

We add our earnest appeal to that of the Directors for financial aid in supporting and increasing the work of the Sanatorium.

VINCENT Y. BOWDITCH, M.D.,

Medical Director.

WALTER A. GRIFFIN, M.D.,

Resident Physician.

TREASURER'S REPORT
